EDUCATION

Northeastern University - Boston Campus, Boston, MA

Sept 2025 - Present

MS in Computer Science | GPA: 3.67 | Expected Graduation: May 2027

Relevant Coursework: Data Structures & Algorithm, Object-Oriented Design, Discrete Structures

San Francisco State University - San Francisco, CA

Sept 2022 - May 2024

BS in Information Systems

Relevant Coursework: Managing Enterprise Data, Data Analytics, Managing Enterprise Networks, IT Project Management

TECHNICAL KNOWLEDGE

Languages: Python, Java, C, C++, JavaScript, HTML/CSS, SQL

Frameworks & Libraries: Flask, SQLAlchemy, Selenium, BeautifulSoup, Chart.js, APScheduler, Resend API, Discord Webhooks

Tools & Platforms: Git, GitHub, Render, AWS, GCP, Chrome DevTools, Linux/macOS

Databases: SQLite, MySQL, PostgreSQL

PROJECTS

NEU Gym Tracker | Python, Flask, Selenium, SQLAlchemy, Chart.js, APScheduler

[Demo](#) | [GitHub](#)

- Built a full-stack web application that scrapes real-time gym occupancy data from Northeastern's recreation facilities using Selenium with headless Chrome, collecting data every 5 minutes via APScheduler
- Designed a REST API with Flask serving 7 endpoints for live counts, historical trends, hourly/daily averages, and occupancy predictions backed by a SQLAlchemy/SQLite data layer
- Developed an interactive dashboard featuring real-time occupancy display with capacity-based color-coding, Chart.js trend visualizations, and a weekly heatmap showing optimal gym times
- Implemented an automated email alert system using SMTP that notifies subscribers when occupancy drops below configurable thresholds for each facility floor
- Implemented automated alert system with Resend API email and Discord webhook notifications that alert users when occupancy drops below configurable thresholds per floor, with hourly cooldown logic

SecurePass | JavaScript, Chrome Extensions API, HTML/CSS

- Developed a Chrome extension enabling users to generate random, customizable passwords and store them locally, with plans for cloud-based storage.
- Contributed to coding, database integration, and project presentation. Future enhancements include company-specific customization options like color schemes, themes, and logos.

WORK EXPERIENCE

Rids Brother Company, Rodeo, CA

Aug 2022 - Sept 2023

Technical Support & Dispatcher

- Coordinated transportation logistics, improving route efficiency by 20% through strategic scheduling and real-time adjustments. Led an initiative to improve route efficiency through tailored routing strategies and applied IT solutions to streamline operations, showcasing exceptional adaptability and problem-solving skills in a dynamic environment.
- Managed 50+ daily technical support calls, achieving a 95% customer satisfaction rating by resolving inquiries quickly and effectively. Maintained compliance and operational integrity through diligent incident documentation and technical issue resolution.
- Enhanced company success by bridging operations and IT through collaborative problem-solving, addressing recurring challenges, and proposing solutions to improve team tech literacy.
